

//how to set up a git repository

1. `git init`
2. `git add file.html file.java file.js`(any file we can push)
3. `git commit -m "Initial commit"`
4. `git push -u origin main`.

//CRUD operations in git

- `git branch demo_branch` (created a branch called demo_branch)
- `git status` (to view the status)
- `git log`(To view commit history)
- `git commit -m "Commit message"`(for update)
- `git rm file_name`(for delete)

//connect with github

- `git remote add origin github_repository_url`
