

```
package Ass_practice_project1;

public class Car { //class defined

    private String color;
    private String engineType;

    public Car(String ColorOfCar, String TypeOfEngine) { //constructor created
        color = ColorOfCar;
        engineType = TypeOfEngine;
    }
    public void CarProperties() {
        System.out.println("color is "+ color);
        System.out.println("Engine is "+ engineType);
    }

    public static void main(String[] args) {

        Car audi = new Car("Black","Patrol"); //Object created
        audi.CarProperties();
    }
}
```
