```
import java.util.*;
public class collection {
      public static void main(String[] args) {
             // arraylist
             ArrayList<String> city=new ArrayList<>();
             city.add("Bangalore");//
             city.add("Delhi");
             System.out.println(city);
             // linkedlist
             LinkedList<String> names=new LinkedList<>();
             names.add("Alex");
             names.add("John");
             System.out.println(names);
              // hashset
             HashSet<Integer> set=new HashSet<>();
              set.add(101);
              set.add(103);
              set.add(102);
              set.add(104);
             System.out.println(set);
             }
      }
